DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 – 3, 5, 7, 9, 11, 13, 15 – 17, 19, 21, 23, 25, 27, and 29, drawn to an optical scanning device with a plurality of scanning optical systems configured to scan different scanning surfaces and a deflector that is commonly used in the plurality of scanning optical systems, wherein the scanning optical systems are provided on both sides of the deflector and a set of scanning optical systems comprising one each of the scanning optical systems on each side of the deflector satisfies the expression $|N - M| = 2k + 1$ where $N > 2$, $M > 1$, $k > 0$, N is the number of optical path inflection mirrors in one of the scanning optical systems in the set, and M is the number of optical path inflection mirrors in the other scanning optical system in the set, classified in class 359, subclass 216.
- II. Claims 4, 6, 8, 10, 12, 14, 18, 20, 22, 24, 26, 28, and 30, drawn to an optical scanning device with a plurality of scanning optical systems configured to scan different scanning surfaces and a deflector that is commonly used in the plurality of scanning optical systems, wherein the scanning optical systems are provided in a sub-scanning direction and two of scanning optical systems have a difference in the number of optical path inflection mirrors that is zero or an even number, classified in class 359, subclass 216.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as an optical scanning device with a plurality of scanning optical systems that are provided all on the same side of the deflector. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was not made to request an oral election to the above restriction requirement.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
